CERTIFIED COUNTER-INSIDER THREAT PROFESSIONAL

Program Information

- September is Insider Threat Awareness Month!
- Two professional certifications: Counter-Insider Threat Fundamentals for individuals who work in or with a program/hub and Counter-Insider Threat Analysis for individuals who contribute to a program/hub's analytic capability
- **Candidate Handbook and Frequently Asked Questions**: Available via https://dodcertpmo.defense.gov
- **Registration:** Available via https://dodcertpmo.defense.gov mid-September through mid-October 2019
- **Test window:** First test window opportunity is November through December 2019. A second window will occur in Spring 2020
- **Test location:** Any Pearson Vue location around the world

Professional Certification

- What is certification?
  Time limited recognition, by use of a credential, of individuals who meet predetermined and standardized criteria.
- This is the first certification scoped for the whole of the US Government and developed with maximum participation across various Executive Agencies
- Conferral Authorities: DoD Under Secretary of Defense for Intelligence and Office of the Director of National Intelligence, Director, National Counterintelligence and Security Center

Certification Benefits

The C-InT Certifications establish workforce credibility, foster a professional identity and catalyzes professional development

For Individuals:
- Fosters understanding of the concepts and principles deemed critical to perform Counter-Insider Threat activities
- Identifies the individual as a certified C-InT professional regardless of position or employing organization
- Promotes professional development

For Organizations/Employers:
- Provides metrics for employee and workforce performance management
- Provides reliable and valid metrics for employment decision-making (e.g., hiring, promotion, transfer out of a work role)

For the Profession:
- Provides summary information about workforce strengths and weaknesses
- Provides valuable information that can be used to integrate workforce initiatives and align supporting capabilities (e.g., training and education) to a common set of skill standards
